Dealer Responsibility

- The three most important aspects of the Dealer's responsibility are professionalism, game security and customer courtesy. Professionalism instills confidence in the players and makes them comfortable at our games. Game security protects us, our customers and our jobs. Customer courtesy keeps the gaming atmosphere pleasant and un-intimidating translating into happy players and repeat business.
- In the game of Caribbean Stud Poker the Dealer is responsible for overall conduct of the game according to the rules and regulations as set forth in these procedures. The Dealer is responsible for keeping the Manager fully informed on the operation of the game as set forth in these procedures. The Dealer is also responsible for informing the Manager immediately should any mistake occur. Corrections of errors must be under the direction of the Manager watching the game.

Dealer procedure Requirements:

- At the completion of each hand (or after opening the game), the Dealer will press the "reset " button allowing players the opportunity to bet on the progressive jackpot. The player is responsible for playing the progressive Jackpot.
- Before the Dealer deals the cards, he / she sweeps the layout with his/ her hand, stopping at players who have not bet on the progressive jackpot and asking if they would like to bet.
- Dealer then continues around the left and finishes by pressing the " lockout" button to restrict further betting on the progressive bet.
- The Dealer deals five cards to each player and to him/ herself face- down, with the exception of the Dealer's last card which is turned face-up.

General Conduct:

1. Dealers will maintain an alert and courteous attitude at all times. If a player needs instruction as how the game is played, be as helpful and courteous as possible without holding up the game for the other players. Do not play individuals hands for the player.
2. Dealers will face the front of the game at all times.
3. Conversation between dealers on separate games is not permitted.
4. On dead games dealers must spread the deck face down in front of the tray; dealers should not touch the cards on a dead game unnecessarily
5. Dealers must not handle customer or house money unnecessarily
6. Conversations with acquaintances must be kept to a minimum.
7. Non-players are not permitted to occupy seats on games, regardless of whether or not the game has action, unless authorized by one of the managers
8. For your protection, and to be above suspicion, never allow friends, relatives or acquaintances to play at your game
9. Gum chewing is not allowed on the casino floor or in public areas.
10. Dealers have to avoid conversations with other dealers when entering, leaving Pits and while waiting to relieve.
11. Never argue with a Manager on a game. When there is a difference of opinion talk about it off the game.
12. Never argue with a guest. If a situation arises, be able to give the Manager as much information as possible. Once the manager is involved, it is their situation to handle.
13. When a situation arises and you don't know how to handle it, call a Manager.
14. Dealers must call all transactions loud and clear.
15. The Dealer will be obligated to applaud once, showing the palms of his hands upwards and downwards to the front of the table :
 - When he/she is relieved from his table.
 - Before touching any part of the body.
 - When separating from a dead game.
 - After every transaction.

to the Bankroll.

At a dead game, dealers will stand parade rest with hands placed on either side of chip tray; no dealer will stand on a dead game with his/her arms folded or his/her body leaning against the table or the shuffle machines neither turn back

Dealers instructing players.

- It is to be expected that many players will ask questions about the game.
- Dealers should handle such request readily and in a pleasant manner. In doing so the following rules should be observed;
- Answers should be concise, though not abrupt.
Do not tell a player how to bet his/her money: only inform them of the possible bets and what they mean.
- Do not delay the game in order to answer a question, but be polite.
- On very busy games it may not be feasible to answer a great many questions. In such cases, pleasantly refer the customer to a Manager.
- Make all explanations in a manner that the customer does not feel foolish or embarrassed for asking the question. Never appear impatient with a question.

Dress and personal appearance

Dealers are required to be well-groomed and neat in appearance at all times.

- Hair styles are to be kept within the limits of good taste that will project an attitude of professionalism. Long hair must be pulled back. (Cannot cover chip tray)
- Finger nail length should be short enough to permit proper chip handling and proper dealing techniques.
- Nametags will be worn at all times. (at dealer's left side)

Customer relations

1. Dealers must be able to maintain the image and international reputation for quality and courtesy that our Casino now enjoys, it is the responsibility of every employee to see that the standards of customer relations are maintained. Consequently, rudeness or unpleasantness on the part of any employee will not be tolerated and will result in disciplinary action
Greet the customer whenever they come to the table or when they pass by the table; make eye contact so they feel welcome to play at your table.

2. Remember that as a Dealer you are impartial, the player must never get the impression that he is being hustled. If he /she makes a request regarding the running of the game try to accommodate his/her wishes. If what he/she wants is contrary to established procedures, then the decision must be left to the Table Manager.
3. If the player is in any doubt as to any action you have taken which concerns him/her, explain politely exactly what you have done until he/she understands. It is of the utmost importance that the player has absolute confidence in the Dealer working at the table. If that confidence is lacking, the operation of the table will not be successful.
4. Do not argue with players, try to explain the situation once, and then let one of the able managers handle the customer.
5. Any misunderstanding with a customer must be handled with tact and diplomacy. Under no circumstances is a Dealer to display anger at a customer. Yelling, threatening, insulting a customer is strictly forbidden.
6. If a customer is suspected of deliberately taking unfair advantage of a game, the Manager must be alerted immediately.

Toke(Tip) procedure:

- Hustling of tokens, either overtly or by implication, is strictly prohibited or will result in immediate disciplinary action.
- Under no circumstances may " sleeper " bets or other unclaimed money on the game be appropriated by the dealers as a token. Such money will be considered house money until claimed. Violation of these procedures will be considered dishonesty.
- Exchange of chips (conversion of larger denomination chips to smaller denomination chips) for tokens (tips) must be made by the dealer with verification by a Manager.
- After receiving a tip, it should be tapped one time and placed in the token box. Do not bang or repeatedly click checks. One tap is sufficient.
- Dealer may not bet back their tokens, it must be "locked up".
- No checks over \$25 will be placed in the Token box. A Manager will authorize any necessary color change and the dealer will place the tokens in the token box.

Dealer responsibility on dead games.

- Dealers must maintain alert posture and facial expressions on dead games. Do not lean on the table. Try to make eye- contact with people.
- Dealers must be cordial to any players coming up to play on a dead game. Any attempts to discourage such customers from starting a game, either overt or implied, will result in disciplinary action.
- Dealers must not unnecessarily handle bankroll on a dead game.
- No money will be allowed on the layout while a game is dead.
- Limited and subdued conversation will be permitted between Dealers on a dead game.
- Bankroll protection must be maintained constantly by all Dealers on dead games.

New Decks:

- The cards will be spread and re-examined by a Manager and the Dealer for duplications, flaws and omissions according to procedures. Both sides of the deck will be checked.
- A Manager may put in a new deck whenever he/ she feel it is necessary.
- Dealers may bring to the attention of a table Manager the condition of the cards at any time they feel it is necessary.
- The reason for asking for new decks are:
 1. The cards are dirty- stick together.
 2. The cards have been in use for a considerable period of time and are hard to use.
 3. When seeing any marked spot on a card, greasy hands, lipstick, drink was spilled on the table, suspicions of foul play.
- The Dealer also must be suspicious of any changes such as:
 1. Usual crimps, nicks or waves in the cards.
 2. Unusual markings or shading of color on the backs of the cards.
 3. The possibility that cards have been added or taken from the deck.
 4. The Dealer must verify that all of the cards are present before dealing.
(shuffle machine will indicate)

NOTE: The removal of any cards from any table prior to the normal usage due to any of the above circumstances must involve Surveillance.

Surveillance will also receive all cards from any table that incurs a significant win or loss of greater than \$10.000 in any shift.

With any Straight Flush and up, the cards has to be sent to Surveillance.

Opening the Table

- The dealer assigned to the gaming table will count the contents of the container in the presence of a table Manager and agrees the count to the Opener slip.
- Signatures attesting the accuracy of the total amount of chips recorded on the table inventory slip will be placed on the Opener by the Dealer and a table Manager that observed the dealer counting the contents of the container.
- The table manager will agree the opening amounts to the data in the computer system from the closure time and having confirmed this agreement the dealer will deposit the slip in the drop box container.
- The Dealer will get 2 decks of cards of different color and shall spread the cards face up (one deck at a time) forming one row in front of him/her. At this time he/she together with a manager will visually re-inspect the cards to ensure that the complete packs are present. He /she will repeat the procedure to inspect the backs of the cards for any flaws, nicks, crimps or discoloration.
- The cards are then washed and will be placed in the shuffle machine to be shuffled.
- After the cards are inspected and shuffled they will be spread out in a horizontal fan shaped form face down on the Table. The other shuffled cards will remain in the shuffle machine.
- Once the cards have been put into play, it is the Dealer's responsibility to ensure that they are kept in good condition.
Decks placed on hand held games suffer much abuse, because customers handle the cards. If you notice something unusual about the cards, or anything of suspicious nature, call your Manager for new decks of cards.

Shuffle of the cards.

There could be times when the shuffle machine is not working and upon direction of the Manager the Dealer will shuffle the cards by hand. In such case the shuffle will be as follows:

Shuffle the deck twice, riffle, and shuffle twice again (subject to change).

Keep the cards flat and low. The bottom card will be covered by the cut card.

Wash the cards after every hand, continue with the game.

Closing the table.

- When directed by the table Manager the float cover will be placed in the center of the layout next to the rail.
- Cash lammers will be spread on the table.
- In the presence of the table Manager the dealer shall remove the highest denomination of chips, break down one stack on the layout to verify as twenty, then re-stack and verify all remaining stacks on the layout. Break down any remaining chips on layout that does not make up a full stack to prove. The Dealer shall call out the total amount of each denomination, starting with the highest. The Table Manager shall verify the amount and record it on the Closer/Opener slips.
- Return chips to the rack using spacers to mark unit amounts. Repeat process in order for all remaining denominations.
- When the slips are completed and totaled, both the table manager and the Dealer shall verify the accuracy of the closer/opener slip as to date, game type, day, table number, amounts and totals. If correct, the table manager shall sign the slip and then the dealer shall sign.
- The dealer shall wait for a table manager to input the figures in the system and after this the dealer will place the yellow copy of the Closer slip in the rack making sure not to cover high denomination checks.
The Dealer will then deposit the original in the drop box, and a Manager will lock the float cover.
- ★ Dealers shall always verify the slip if all signatures are present before dropping the slip.
- The Dealer shall double check the security of the bankroll lid prior to leaving.

Note: Only the dealer is allowed to drop the Closer slip unless 2 table Managers conduct the count.

Dealers may start sorting before the closing process but always with the lid (float cover) placed on the chip rack.

MAKING CHANGE

Color Change

1. \$1.00, \$5.00, \$100.00, and \$1,000.00 cheques (chips) shall be run down in stacks no greater than 5 cheques high.

EXAMPLE:

1 through 5 - 1 stack

6 3 - 3

7 3 - 3 - 1

8 4 - 4

9 4 - 4 - 1

10 5 - 5

11 5 - 5 - 1

20 5 - 5 - 5 - 5

(No more than 20 cheques in a row)

2. \$2.50, \$25.00, \$500.00 and \$5,000.00 cheques shall be run down in stacks no greater than 4 cheques high.

EXAMPLE:

1 through 4 - 1 stack

5 - 4 - 1

6 - 3 - 3

7 - 3 - 3 - 1

8 - 4 - 4

9 - 4 - 4 - 1

10 - 4 - 4 - 2

12 - 4 - 4 - 4

20 - 4 - 4 - 4 - 4 - 4

(No more than 20 cheques in a row)

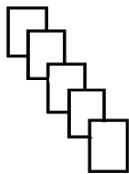

When proving more than one full stack, prove one stack of twenty chips then stack it up to prove the remaining stack(s).

- \$1,000 chips will be cut 2, 2 and 1; then stacked up in 5's and sized into.
- \$500 & \$5,000 chips will be cut 2 and 2; then stacked up in 4's and sized into.
- Chips will be spread (splash) at the end of **each** transaction to verify for surveillance.

Counting money:

All cash Buy- Ins will be counted using the following procedure:

1. Buy- ins of less than \$2.000 in \$100 Bills-
 - Run down a row of five (5) \$100 bills vertically.
 - Run down the next five (5) \$100 bills vertically in a row parallel to the first.
 - Continue this for up to four (4) \$500 rows before forming \$1.000 stacks
2. Buy – ins of less than \$500 in Tens (\$10) and/ or Twenties (20)
 - Rundown \$100 vertically.
 - Run down the next \$100 vertically in a row parallel to the first.
 - Continue this process for up to 5 rows of \$100 each.
4. Odd amounts will be placed in a separate row.
3. Buy-ins of \$100 Bills in excess of \$2.000
 - Rundown four (4) rows of five (5) \$100 bills vertically.
 - Form two stacks of \$1.000
 - Place the \$1.000 stacks perpendicular (upright) to each other.
 - Repeat this process to form a crossing pattern; each stack clearly designated \$1.000.
4. Buy-ins of \$500 or more in Tens (\$10) or Twenties (20)
 - Rundown \$100 vertically.
 - Form a stack.
 - Run down the second \$100.
 - Place this stack perpendicular to the first.
 - Repeat this process to form a crossing pattern; each stack clearly designating \$100.

5. Buy-Ins of mixed denominations:

Bills should be separated by denomination and counted as above.
Any odd amount under \$100 should be left spread.

\$500 and \$1.000 gaming chips must be handled carefully and clearly.

- **To run down a stack of twenty \$500 chips.**

1. Drop (2) checks on the layout or (\$1.000) value).
2. Size it once.
3. Stack to make (4) (\$2.000 value)
4. Size (4) times, creating (5) stacks of (4) or (\$10.000 value)
5. Spread chips at the end.

- **\$1.000 chips shall be run down as follows:**

1. Drop (2) checks on the layout or (\$2.000 value).
2. Size once to form (2) stacks of (2) or (\$4.000 value)
3. Add one cap and form (5) chips and total \$5.000
4. Stack and size into the original stack of (5) chips forming (4) stacks of (5) chips and a total of \$20.000.
5. Spread chips at the end.

Note: Call all transaction loud and clear before beginning with the transaction.
Do not cover the stack with palm of your hand.

When making change for currency:

- a. Place the bills face up on the table. Call out “change only” (or money change) in a clear audible voice, placing the currency (face up) to the left side of the layout in front of the rack, no further than the center of the rack.
- b. After calling out the amount, cut out checks equivalent to the amount being changed on the right side of the layout in front of the rack, known as the working area. If the amount is \$100 or over wait for the Table Manager’s approval.
- c. Place change in front of the player; do not place change in betting circle.
- d. Make eye contact with the player and announce the amount of change to confirm that the transaction is complete.
- e. Wish good luck.

When making change for chips:

- a. Call out in a clear audible voice “chip change”.
- b. Bring the chips on the left side of the layout in front of the rack. Then follow “b” through “e” above.

Changing Color for cash out chips

The Dealer shall announce “**Color Coming In**”.

- The Dealer will clear hands and bring the chips to the left side of the working area.
- Count them down, and announce the total of the color for the Table Manager's approval. Cut out an equal amount of higher denomination chips on the right side of the work area.
- Bringing in mixed denomination color:
Start with the highest denomination chips. Chips are counted down starting closest to the Dealer (rack) and working out, with odd chips amounts to the side.

When issuing chips in exchange for a Marker:

- Inform a table Manager a Marker has been requested.(Shift, Operation's or Pit Manager)
- After verifying in the system **a Manager will place the lammer** on the layout in front of the dealer
- After getting approval from the Table Manager, cut out the appropriate amount of gaming chips and give to the player. Remove the lammer to a neutral area.
- The table Manager will process the request and return to the table with the Marker and will let the player sign and then the dealer.
- Dealer will verify all information on the Marker (Player's name, Game type, Table number, amount of the Marker)
- Dealer signs his/her name and kronus number.
- A Manager will sign.
- The Drop box copy of the Marker will be placed on the table, face down.
- The processed part of the marker(cage processed) will be returned to the table and dropped together with the copy of the marker that remained at the table.

- ★ Never give or take currency or chips from a player's hand.
- ★ Call all transaction in a clear audible voice.
- ★ Dealers are required to verify the accuracy of all markers (or Front money withdrawals) on their game. All chips must be cut down and proven and must agree with the amount stated on the marker (Front money withdrawal)
- ★ Dealer must verify that all marker buttons ("lammers") put up to indicate " transaction in progress" are removed when the Drop Box copy is placed in the drop box.

Note:

- Money (cash) does not play under any circumstances.

- Never give or take currency or chips (chips) from a player's hand.
- Currency and chips (chips) less than \$100 must be called
LOUD AND CLEAR, than share with your manager.

Chips will be spread after cut.

Bankroll maintenance:

- The stacks shall be used from the outside tubes of each denomination. Highest values from one stack only.
- Dealers shall tidy their tray intermittently so that all stacks are completed 20's except for one of each value on the right hand side. This must not cause long pauses between hands; it can be affected over a period of time, or when relieving.
- Do not keep players waiting while you clean up the rack.
- Plastic markers are to be inserted and maintained between the 20th and 21st chip and after the 40th chip (if any) in each rack.
Keep a table manager posted whenever possible if and when a player "pockets" chips.

Fills.

When a fill is delivered to a game; the Dealer will empty the chips from the racks. The highest denomination will be closest to the Dealer. Cut down one stack of the highest denomination of chips stack and size into the remaining stacks.

The manager will verify the amounts and sign the slip. After signing the manager puts the Fill Slip on the table and the Dealer will check the following information:

1. Date
 2. Time.
 3. Pit
 4. Game Type
 5. Table number.
 6. Amount of each denomination of gaming chips.
 7. Fill total.
- After visually checking and agreeing on the accuracy of the Fill and the Fill slip, the dealer will sign and ensure that the Security, cashier and the manger have signed the Fill Slip.
 - The Dealer will leave the yellow copy face down on the table near the dropbox slot.
 - The back of the slip should have the total amount of the fill written clearly so surveillance can verify the amount.
Such copies will stay on the Table for at least one round of play and will be dropped afterwards only by the dealer

If an error of any kind is found during verification, the fill and fill slip will be returned to the cage for correction. The chips will not be added to the bankroll.

Credits:

When the Security Officer arrives at the table with the Credit Order, the exact amount of chips to be removed shall be proven in the work area by the Dealer and supervised by the table Manager and Security Officer and placed in the chip carrier.

The Dealer will verify that the information on the Credit Order is correct:

1. Date
 2. Time
 3. Pit
 4. Game Type
 5. Table Number
 6. Total of all denominations of gaming chips.
 7. Credit total.
- The Table Manager and the Dealer then sign the Credit request together with kronus number.
The Security Officer will bring the slips at the Cashier for processing and verification, and shall return from the cashier's cage with the copy of the Credit request signed by the cashier who accepted the chips. The Dealer will then drop the slip.
 - Should an error or irregularity be noted by the Dealer, he/ she will not sign the Credit slip, or allow it to be dropped. A table manager must be notified for appropriate action.

PROGRESSIVE BET:

- A player wishing to participate in the progressive portion of the game may wager \$1.00 by placing it on the red circle above the Ante. The red light will illuminate indicating player has made a progressive bet.

ANTE:

- The ante is the opening bet for the players.
Prior to the first card being dealt for each round of play, each player will make a wager. This is called the "Ante" bet.
No "ante" bet shall be made, increased or withdrawn after the first card of the respective round has been dealt.
Once all antes are placed in the ante circle, the cards are ready to be dealt.
If a player wishes to "call" (stay in the game) he/ she must make an additional bet exactly twice the amount of their "ante" bet.

Note: Prior to dealing the cards, the dealer will press the " Lock – out button" restricting any more betting on the progressive jackpot.

BET BY PLAYER TO "CALL" DEALER'S HAND:

- This is the last bet a player can make. If the player believes he/she can beat the dealer's hand with the five cards dealt to him/her , he /she makes an additional bet of exactly twice the amount of their ante to "call" the dealer.

Note: If a player doesn't feel he /she has a good enough hand to beat the dealer, the player does not have to make the final bet to "call" the dealer and will " fold" at this time. The dealer will collect the ante and the cards.

Playing the game:

- The player plays only against the Dealer; after each hand player and dealer will compare who has the highest card.
- The Dealer deals five cards for the players and at the end five (5) cards for himself/ herself.
- Dealer's bottom card will be placed face up on top of the rest.
- The Dealer will spread the cards, count them, and place them for the player at their right hand near the "ante" bet.

- The Dealer will place the cards for spot number 1 and 2 with his/her **left hand only**.
Do not show the bottom card.
- Dealer will press the green button on the shuffle machine to take out the rest of the cards to place them in the discard rack. Only after this is done, the player can look at his/ her cards.
- Player will make a decision to "fold" or "call" meaning, if they have a qualifying hand to stay in the game to beat the Dealer.
- If a player "call", they must make an additional bet exactly twice the amount of their ante bet and will place the cards face down at their right hand near the "ante "bet on the table.
- The dealer collects the cards and the Ante bet of the players who have chosen to "fold." The dealer must spread the cards, count them then place them into the discard rack.
- The dealer then turns over the remaining four cards of his / her hand.

- The dealer must have a hand of at least an **ace / king** or higher to open (qualify). If a hand does not contain at least an **ace / king** or higher, then the dealer will call "no hand" and pay even money on the "ante" **only** for the player who have called. (unless there is a winning hand for the progressive jackpot)

Dealer has to qualify with
Ace / King or better

- If the dealer's hand contains an **ace/ king** or higher, the dealer's hand is then compared with the player's hand and the highest poker hand wins.
- If the dealer's hand is the highest poker hand, he / she collects all antes and bets individually and in order, counts all cards and presses the reset button.
- If the player wins he will turn only his/her winning hand (cards) faces up and leave his/ her cards on the table.

For example:

Player has pair of six (6) and dealer has pair of three (3).

Player turns only his/ her pair of 6 face up and the rest face down.

If this was the other way around, player having pair of 3, then the player does not need to turn his cards face up and will leave them face down on the table.

- If the player's hand beats the dealer's hand, the dealer pays even money on the ante, and depending on the player's hand pays a bonus on the bet as follows:
- 1 Pair Even money

- | | |
|------------------|---|
| • 2 Pairs | 2 to 1 (up to table maximum payout) |
| • 3 of a kind | 3 to 1 (up to table maximum payout) |
| • Straight | 4 to 1 (up to table maximum payout) |
| • Flush | 5 to 1 (up to table maximum payout) |
| • Full House | 7 to 1 (up to table maximum payout) |
| • 4 of a kind | 20 to 1 (up to table maximum payout) |
| • Straight Flush | 50 to 1 (up to table maximum payout) |
| • Royal Flush | 100 to 1 (up to table maximum payout) |

These pay offs are normal table payoffs and are in addition to the progressive jackpot payoff.

- After each round of play the dealer will spread / count all cards, collect each player's cards individually and reshuffle after pressing the reset button, which unlocks the progressive jackpot bet.

When paying a winning hand cards must be spread correctly so surveillance can have a clear view of the cards.

Progressive Play:

- If any one of the hands are made by a player that would qualify him/ her for the progressive payout (Straight, Flush, Full House, 4 of a Kind, Straight Flush or Royal Flush). You must perform the following:

1. Verify that the player with the winning hand has bet on the progressive jackpot.
2. If a player is participating in the progressive jackpot and has a hand which qualifies him/ her for part or the entire progressive jackpot, call a Manager and announce the winning hand. If this is a 4 of a kind and up, surveillance needs to be called to verify if everything is correct. After receiving the call from surveillance that everything is ok (no switching of cards took place or if the player did something out of normal procedure) with approval from the Manager, the payout will be made.
3. If the payout is a 4 of a kind and up, new decks will be placed in the game.
4. If the hand is a Straight Flush or Royal Flush, the decks will be delivered to Surveillance.
5. If the player isn't participating in the Progressive jackpot and makes a Flush, Full House, 4 of a kind, Straight Flush or Royal Flush (hands that would normally qualify player for progressive jackpot) call a Manager to announce the payout and with approval proceed to pay based on the normal table procedures and odds, and not the progressive odds.
6. Payout will be made up to table maximum which is \$1.000.
7. The Dealer will wait for payout and all necessary paperwork before pressing the lock out panel button.

★ **Reminder:** The Dealer must have a qualifying hand, and player must beat the Dealer's hand in order to be paid in this instance. If the Dealer does not have an ace/king or better, only ante is paid.

- The Dealer collects all the cards. He /she press the reset button which returns the system to a new start position.
- **Note:** A tie hand between player and the Dealer constitutes no action and is a "push"
- Any tie between player and the Dealer, the 3rd, 4 or 5th card breaks the tie.

For example:

Dealer has a pair of 6 and player has a pair of 6. The highest 3rd card wins the hand. Dealer and player have same 2 pairs, the player's 5th card is an 8 and Dealer's 5th card is a 3. Player wins because his fifth card is higher. Player has a flush Dealer has a Flush; Player will be paid for the progressive only.

PROGRESSIVE JACKPOT:

- When playing for the progressive, the player places 1\$ on the red circle above the Ante.
- Before dealing a hand, the dealer presses the lock out button.

- After the lock out button has been pressed the red circle will indicate with a red light who is betting for the progressive; no more bets will be accepted after this.
- After the hand has been dealt and the player declares a jackpot hand, the Dealer will call a manager to announce the winning hand.
- The manager will approve the payout and will make a slip with the corresponding payout.
- Two managers will sign the slip together with the dealer and the dealer will verify if all information are correct on the slip, like a table number, time, date, the winning jackpot and the amount before dropping the slip in the drop box.
- A manager will insert payoff key and reset progressive jackpot. The amount of jackpot will automatically be deducted from the progressive jackpot amount, and the new adjusted progressive jackpot will be displayed.
- The dealer will now hit the "reset" button and continue with a normal game.

Note: Regardless of whether the Dealer's hand meets minimum opening hand requirements of an ace / king or higher, players whose hands qualify for the progressive jackpots are eligible and will be paid for the progressive only. If a dealer does not have a qualifying hand in the above case, the ante and the progressive will be paid, NOT the bet to call the Dealer.

★ Progressive jackpots payoffs: ★

Royal Flush	100%
Straight Flush	10%
4 of a kind	\$500
Full House	\$100
Flush	\$50
Straight	\$25

- If two or more players have hands that qualify them for the progressive jackpot, each winning hand will be paid from the stated jackpot at that time.
- **Qualifying hands for the Progressive Jackpot on the same deal will be paid a lesser jackpot amount first. (Straight Flush and Royal Flush)**
- **If two or more players qualify for all (Royal Flush) or part (Straight Flush) of the progressive jackpot during the same hand the winners will share the Jackpot as an aggregate.**
- If two or more players qualify for the progressive jackpot during the same hand, the payoff will be accomplished as follows:

Pay the lowest value hands first, progressing to the highest value.

Example:

Three players qualify for the progressive jackpot:

Player # 1 first - \$100 (push button to reduce progressive amount)

Player # 3 second - \$500 (push button to reduce progressive amount)

Player # 2 third - 100% of remaining jackpot (push button reduce progressive amount)

Game Protection:

- You cannot protect a game that you're not watching. It is impossible to look around the room or talk to friends while trying to keep track of all bets, the cards, the discard rack and the chip tray and be aware of any unusual movements made by the players.
- Never turn your back on the bankroll even if you have a dead game.
- Be aware of the condition of your cards. If you see any defects, call it to the attention of a Manager.
- Stand squarely in front of the game at all times. **Never lean on the game.**
- When changing the deck, be sure to check the deck for completeness with the Manager.
- Be sure to watch any player handling money or inconsistently putting their hands over the money.
- When dealing to any bet of \$100 or more, the Dealer must call out "checks play" so that the table manager is aware of the action.
- Walk your game; move from the left position to the discard position as you are dealing with the player's hand. This offers more visual game protection. Pay special attention to position 1 and 7.

Note: If there is any discrepancy with respect to the interpretation and implementation of the rules, one of the Managers working in the Pit will be notified.

- Dealers must make sure that the discard rack is empty before shuffling commences.
- Always case the layout once you announce, " No more Bets". Protect against "past posting"

Irregularities

1. Any exposed card does not constitute a misdeal, game continues, but if 2 of the dealer's cards are exposed it will be considered a misdeal.
A Dealer's card found face up, that card will be used as the upper dealer's card.
If more than one card is found face up in the shuffle machine or the deck during the dealing of the cards, all hands shall be voided, the cards shall be reshuffled.
2. If any player or the Dealer is dealt an incorrect number of cards, all hands shall be voided, and the cards shall be reshuffled.
3. If the shuffle device jams, stops dealing cards, or fails to deal all cards during a round of play, the round of play shall be voided, the cards shall be removed from the device and reshuffled.

Important: A player may not exchange or communicate information regarding his/her hand.

General rules.

1. All the player's cards must be placed on the table before the dealer compares the first hand.
2. The dealer compares / pays and takes from right to left.
3. Pay ante by sizing into the bet for speed and accuracy.
4. Do not total bet and ante.
5. All bets for the dealer are paid last and will be paid the odds if applicable.
6. Cards must be picked up in order to ensure that backing- up is possible. Never back up hands without a Manager's permission.

Table minimum and maximum:

- Minimum bets and maximum payouts for any given game will be indicated on a table limit sign located on each game.
- Limit on the "Ante" is up to \$250
Limit on "Bet" is \$500.

All payouts are up to the table limit which is \$1.000

Placing of the cards:

- Before placing cards for the guest the Dealer will spread the cards to verify if all five cards are present.
- The Dealer will place cards at spot number 1 and 2 with left hand only.
- The cards are placed at the right hand of the player near the "ante" bet.
- When paying a winning hand, cards will be spread in a clear view for surveillance and the manager who is watching the game.
- When taking out the cards from the shuffle machine bottom card cannot be exposed.
- After each round of play, the Dealer will collect all cards individually and always verify first if all five cards of each player are present.
