DEFINITIONS

Ace: A single die showing one spot up.

Aces: Craps- two. One die showing "one spot" up and the other die showing "one spot" up.

Ace Deuce: three Craps, one dice showing "one" and the other showing "two"

'Any': The "Any Craps" bet, includes the 2, 3 or 12.

Backside: Don't Come bets against numbers repeating before a "seven" is thrown. Also called the "back line"

Back-up: To take odds on a bet.

Bankroll: House money (gaming chips) used to make payoffs and change. It is kept in the back center portion of the table.

Box:

- The non-betting portion of the layout in front of the bankroll.
- The "drop box" onto which all paper currency, fills, credits, table drop vouchers, markers, front money withdrawals, etc, are placed.

Boxcars: Twelve-Craps (two sixes, face – up)

Box person: An employee authorized to supervise Craps game.

Buy- bet: By paying a 5% commission on the amount of wager of \$20 or more on the 4, 5,6,8,9 and/ or 10 the payout ratio improves from 9:5 to 2: 1 on the 4&10, from 7: 5 to 3: 2 on the 5&9 and from 7: 6 to 6: 5 on the 6&8.

C and E: A split bet covering both Any Craps and Eleven. Also called "Craps – Eleven"

Call Bet:

- A wager made verbally without money accompanying it to cover the best.
- A proposition bet not marked on the layout.

Note: Absolutely no call bets will be accepted.

DEFINITIONS

Cocked die: A die having one or more sides leaning against chips or another object with no discernible skyward sides

Come out roll: Any roll on which a Pass Line point may be established.

Contract Bet: A bet which may not be removed or reduced once a point has been established for it. Pass Line and Come Bets are contract bets.

Crap out: To roll one of the Craps numbers, “two “, “three’ or “twelve” in the come out roll.

Crossfiring: Dealers talking to each other across a live game that is not game related. **This is not permitted.**

Dead game: Table is open but has no players, no “action”

Dice bowl: The container on the game which holds dice which are not in play, but which are available for use.

Dirty money: Gaming checks from losing wagers which have not been returned to the Bankroll.

Don't Bets: Don't Pass and Don't Come bets.

Drop Cut: The technique of holding a stack of chips in one hand and touching the stack to the table, then lifting the stack, leaving a precise number of chips on the table.

Deuce: A single die with two spots up.

Easyway: To make a point number 4, 6, 8 or 10 in any way but the **hardway**.

Flat Bets: The original Pass, Come, Don't Pass, or Don't Come bets to which an odds bet is attached. It is paid even money.

Flat Payoff: An even- money pay off

Front line: The Pass Line

Front Side: Pass Line or Come bets.

DEFINITIONS

Hand: A sequence of individual throws of the dice beginning with the shooter's first Come out roll and terminating with a "seven- out".

Hardways: Double (2) equals "Hard " 4, Double (3) equals "Hard" 6, Double (4) equals " Hard" 8 and Double(5) equals "Hard "10.

Hawking: Following the dice with your eyes to the opposite side of the table when you should be watching your end of the table.

Lammer: A plastic disc used to indicate the amount of a marker or money taken from the Bankroll

Live Game: Table is open and has players and betting activity.

Lock – up: Put into the Bankroll. Losing bets are " locked- up"; i.e., taken and placed in the Bankroll.

Marker: A special casino check or draft used by the player to draw chips against credit or money on deposit in the casino cage.

Natural: "7" or "11" when thrown on a Come- out roll.

Off: Indicating that a non- contract bet such as place bets are not in action for a specific throw of the dice

Off and On: Paying a winning Come bet and replacing it with a new Come bet without first removing the old bet to the Come Line and bringing up the new bet. This can only be done when the flat bet is identical in value.

On/Off pucks: Are round and approximately three inches across. Black on the side where the word "off" is written and white on the side where the word "on" is written; with two rubber "o" rings on the circumference. Used to mark the point

Paddle: A plastic device used to push currency into the drop box.

Parlay: To increase a bet by the total amount previously won on the bet.

Past post: To illegally make a wager on a number after that number has been declared a winner.

DEFINITIONS

Pinch: To illegally remove part or all of a wager

Point: The number which must be repeated before a “seven” is thrown in order for a Pass Line bet or Come bet to win.

Press: to increase a bet by an amount equal to the original bet. Also to increase a bet, usually a place bet, by any amount. **Example:** Press my \$24 six to \$30.

Proposition (“Prop”) bet: A one roll bet involving 7, 11, 2, 3 and/ or 12 and/ or any combination thereof.

Push: A standoff, tie. Example: A twelve is rolled on the Come- Out roll and the player has a bet on the Don’t Pass Line.

Rail: The area of the table the players place chips.

Roll: The sequence of the throws beginning with the Come- Out roll and ending with a pass.

Runover: When the stickman pushes the dice out to the shooter before all the work has been completed by the Base Dealers from the previous roll. This must be avoided.

Sleeper: An unclaimed bet.

Snake Eyes: Double “Aces”

Shooter: The player who throws the dice.

Sleeper: An unclaimed bet.

Split: One wager covering two or more bet types (Example: “C and E”)

Sleeper: An unclaimed bet.

Stack: To place the odds bets on top of the flat bets.

Second base: The Dealer to the right of the boxperson.

Square the dice: to bring the dice in front of the boxperson so all sides can be seen.

DEFINITIONS

Take/ Lay: to make an odds bet. A player “takes” odds on front side bets and “lays” odds on backside bets.

Third Base: The **Dealer** to the left of the **Box person**.

Toke/Tip: A gratuity.

Totaling: To combine the payoffs for both the flat and odds portions of a bet into a single payoff rather than pay the flat bet and the odds bet separately

Total conversion: Taking a player’s entire bet to arrive at the payoff.

True Odds: Actual and correct odds given to each of the point numbers

Virgorish: Also known as “vig” or “juice”.
The 5% commission on bets such as **buy bets** or **lay bets**.

General description of the Crap crew

- There are four Dealers assigned to a single Craps game. These four individuals make up a Craps “crew”. At any given time only three of these Dealers are working on the game, the fourth being on break.
Of the three working dealers, one is the “stickman” and the other two are the “inside dealers”
Each of these positions is held in rotation by the individual members of the crew, at the discretion of the Boxman. (One of the managers from the Pit assigned at Craps for that day).

The Stickman:

- The “Stick” position is located at the center of the outside of the table. The stickman carries the primary responsibility for the conduct and pace of the game. The Stickman gives the dice to the player whose turn it is to roll, calls the total of the dice after they have stopped, and then returns them to the box.
The “Box” is the inside center section of the table in front of the bankroll. Any time the dice are outside of this area, the stickman must watch them closely. A primary function of the Stickman is to provide dice security and recall dice which have left clear view or which are in any other way suspect.
- The Stickperson is responsible for booking all proposition bets, taking all losing “proposition bets” and observing payoffs to ensure accuracy. The Stickperson must also “advertise” the existence of the various proposition and other bets available to the players. This should be done between rolls of the dice. At this time, the Stickperson will observe the work of the inside Dealer on the end of the table to which the dice are being thrown.
The Stickman helps to ensure accuracy of payments and game security.
- It is also the Stickman’s responsibility to determine whether or not any given throw of the dice is legitimate according to the **Casino procedures**.

Base position.

- There are two Inside Dealers (Base Dealers); one located at each end of the inside of the table. They are responsible for taking, paying and booking all bets on their respective ends of the layout. They also handle any buy-ins, chip change and/or color changes needed by the customers, as well as booking and paying proposition bets on their respective ends of the table. The inside Dealers are also responsible for marking the point number with the "puck" and removing the puck from the previous point number prior to each new "come-out" roll. The Dealer on the end where the dice stop must visually confirm the Stickman's call and correct any miscalls verbally.

★ **Note:** While each Dealer has specific individual tasks for which he or she alone is ultimately responsible, a Craps crew must be thought of **as a team**. As such, they must work closely together, and on occasion assist one another to the degree physically possible and consistent with overall game security.

General Conduct

1. Maintain an alert and courteous attitude at all times. Should a player need instruction regarding the game, be as helpful and courteous as possible without holding up the game or inconveniencing other players on the game.
2. Never turn back from the game while on the table. Face the front of the game at all times. Do not fold your arms.
3. Conversations with other Dealers not specifically related to the game in progress are not permitted.
4. Conversation with acquaintances must be kept to a minimum on "dead" games and is prohibited on "live" games.
5. Do not handle customer or house money unnecessarily.
6. When in dealing position on "live" game, Crap dealers must pay close attention to their respective areas of the layout. Gazing around the casino while the game is in progress or becoming otherwise distracted from the layout is strictly prohibited.
7. Must provide protection of the bankroll and any wagers on the layout at all times.
8. "Hawking" the dice is strictly prohibited.
9. Handling or carrying the player's money with house money in the dealer's hand at the same time is absolutely prohibited.
10. The game will be dealt in such a manner that any person not directly connected with the game can understand exactly what is happening at all times.
11. Responsible for seeing that the game is properly protected and efficiently operated.
12. Responsible for seeing that new croupiers are gradually worked into the crew.
13. For your own protection and to avoid suspicion, friends, relatives and close acquaintances should be discouraged from playing on your table.
14. Hustling of tips is strictly prohibited.
15. Gum chewing is not allowed.
16. Never argue with a manager on a game. When there is a difference of opinion, talk about it off the game.
17. Always inform the box man before correcting any mistake or if anything unusual is occurring.
18. Dealers will not stop to talk to other dealers when entering or leaving the Pit.
19. Dealers will not play with gaming equipment on dead game.
20. The Dealer will be obligated to applaud once, showing the palms of his/her hands upwards and downwards to the front of the table when:
 1. When he/she is relieved.
 2. After all transactions.
 3. Before touching any part of the body
21. All routine Dealers are required to read and be thoroughly familiar with the General Procedures.

Note: Failure to comply with rules will result in disciplinary action.

- The Croupier will invite players around a dead game to play.

Acknowledging bets:

- Acknowledge and call out all bets clearly so that the player, other Dealers on the game, and Box man will understand the bet.

Example: Player hands Dealer \$5.00 to put on eleven- Call out: "\$5.00 on eleven"

- Player hands Dealer \$50.00 to place on ten- Call out:" Placing 10 for \$50.00"
- Player hands Dealer \$30.00 the point is five and wants to place the other numbers, call out "27 across, three change"

 **There are no secrets on a Crap Game-** let everyone know what is going on.

Dealers instructing players:

- Craps Dealers should be aware that for many customers Craps is a difficult game to understand. Therefore it is to be expected that many players will ask questions about the game. Dealers should handle such requests readily and in a pleasant manner. In doing so the following rules should be observed:
 1. Answers should be concise, though not abrupt.
 2. Do not tell a player how to bet his/ her money; only inform them of the possible bets and what they mean.
 3. Do not delay the game in order to answer a question, but be polite.
 4. On very busy games, it may not be feasible to answer a great many questions. In such cases, pleasantly refer the customer to a Manager.
 5. Make all explanations in a way that the customer does not feel foolish or embarrassed for asking the question. Never appear impatient with a question.

Customer relations:

- Dealers must be able to maintain the image and international reputation for quality and courtesy that our Casino now enjoys. It is the responsibility of every employee to see that the standards of customer relations are maintained. Consequently rudeness or unpleasantness on the part of any employee will not be tolerated and will result in disciplinary action.
 1. Greet the customer whenever they come to the table or when they pass by the Table; make eye contact, so they can feel welcome to play at your table.
 2. The player must never get the impression that he/ she is being hustled. If he/ she makes a request regarding the game try to accommodate his/ her wishes. If what he/ she wants is contrary to established procedures, then the decision must be left to the Box man,
 3. If the player is in any doubt as to any action you have taken which concerns him/ her, explain politely exactly what you have done UNTIL HE/ SHE UNDERSTANDS. It is of the utmost importance that the Player has absolute confidence in all the Dealers working at the table. If that confidence is lacking, the operation of the table will not be successful.
 4. Do not argue with players, try to explain the situation once, then let the Box man handle the customer.
 5. Any misunderstanding with a customer must be handled with tact and diplomacy. Under no circumstances is a Dealer to display anger at a customer.
Yelling, threatening, insulting a customer is strictly forbidden.
 6. If a customer is suspected of deliberately taking unfair advantage of a game, the Manager must be alerted immediately.

Take (Top) Procedure:

- ❖ Hustling of tokens (tips), either overtly or by implication, is strictly prohibited.
- ❖ Under no circumstances may " sleeper" bets or other unclaimed money on the game be appropriated by the dealers as a token. Such money will be considered house money until claimed. Violation of these procedures will be considered dishonesty.
- ❖ If a customer throws a token and does not specify that the Dealer bet the token, or gives the Dealer the option to bet or keep the token, the token must be put in the token box.
- ❖ \$100.00 chips or higher will not be placed in the token box, unless approved by the Shift Manager on duty.
- ❖ Dealers may not bet their tips, this must be dropped.
- ❖ Dealer's tips will be dropped in the tip box by the Boxman.

Dealer responsibility on Dead Games:

- Dealers must maintain alert postures and facial expressions on dead games. Don't lean on the table. Try to make eye contact with people.
- Dealers must be cordial to any new players coming up to play on a dead game. Any attempts to discourage such customers from starting a game, either overt or implied, will subject the Dealers involved to disciplinary action.
- Dealers must not unnecessarily handle bankroll money or equipment on a dead game.
- When a game goes dead all house money must be returned to the bankroll area. No money will be allowed on the layout while a game is dead.
- Equipment must be arranged in an orderly fashion in the " box" area on dead games.
- Limited and subdued conversation will be permitted between Dealers on dead games.
- Bankroll protection must be maintained constantly by all Dealers on dead games.

Duties and Responsibilities: Game Protection

It is the Dealer's responsibility to become aware of situations around the game. There is no procedure in acquiring the ability to "read" players. The Dealer must pay attention to the various betting patterns of the players. This is called "**Game Intuition**".

1. Watch the game at all times. It is impossible to look around the room and keep track of all bets, the dice and be aware of any unusual movements or errors made by the players.
2. When the shooter has the dice, both the Dealer on that end and the Stickperson should watch the player's hand. When the dice are rolling your way, read the total on the dice and confirm the Stickperson's call.
3. The Dealer on the same end as the shooter should NOT "hawk" the dice. Keep your eyes on the layout in front of you.
4. It is the Dealer's responsibility to be aware of the amounts bet and to whom they belong. Be particularly aware of bets made on the Don't Come and Don't Pass Line. These are the most vulnerable points on the layout for past-posters and pressers.
5. The Dealer should repeat each bet he/she places for the player so both the player and the Box person can hear and understand the bet.
6. **Never** pay with dirty money.
8. Show clean hands before cutting down a stack of cheques.(chips)
9. When handing off a stack of cheques, **do not** palm the cheques.
10. The Base Dealer should use the hand **closest** to the box when taking cheques out or putting cheques into the bankroll. Only take out or return a full stack of cheques.
11. The Dealer is responsible to visually check all odds taken on the Pass and the Don't Pass Line bets for the proper amounts.
12. Continually case the layout. Know what you must do before you have to do it.

Deal a clean readable game, every procedure on a Craps game is in place for a reason, follow them all. Use common sense and good judgment.

Dice Security

Check all dice to ensure that they are strictly fair and are, in fact, our **Casino's dice**. All procedures regarding dice security must be followed exactly. Negligence in the area will result in disciplinary action. While all dealers bear responsibility for dice security, the major share falls to the stickman. He/she must see that the following procedures are observed.

- The stickman must keep his/her eyes on the dice at all times when the dice are outside of the "box" position. Under no circumstances may the stickman become distracted from watching the dice.
- A set of five dice shall be present at the Craps table during the game. Control of the dice shall be the responsibility of the stickman which include those in both active play and those in the Dice Bowl at the table.
- Dice must be checked under the following conditions:
 1. When one or both dice have gone off the table, they must be checked before further use by the Box man.
 2. When one or both dice have left the clear sight of the Stickman, both dice must be checked before further use.
 3. When one or both dice have been passed from the hands of one customer into the hands of another, both dice must be checked before further use.
 4. At any time the stickman or another dealer has reason to suspect a die or pair of dice, a Box man must check them before returning them to play.
- Dealers must be familiar with the type of dice being used on their game, including color, surface, monogram, edge type and serial number.
- After every roll, bring dice to center of the table and square them off so the Boxman can see the opposite sides of the dice in the mirror.

Changing the Dice:

- If a player asks for a different set of dice, bring old dice to center of the table and give him/ her a new set.
When the dice must be checked, the shooter still has the privilege of requesting the same dice. As a matter of customer courtesy such requests will be honored whenever feasible.
- a. At such times, Stickman have to call " same dice"
When to grant a request for the same dice would mean undue slowing of the game, the Dealer or Box man must politely explain the problem to the shooter and ask him/ her to select a new pair.
- b. When one or both die goes off the table, the dealer will let the player choose one or two out of the three dice left in the bowl. The player has the option to request same dice but the Box man must check them before returning them to play.

Shooter Rotation and requirements:

- The opportunity to throw the dice will be given to each customer in rotation clockwise around the table. At the commencement of play, the stickman will offer the set of five dice to the player immediately to the left of the Box man. If such player rejects the dice, the Stickperson shall offer the dice to each of the other players, in turn, clockwise around the table until one of the players accepts the dice.
 - The first player to accept the dice when offered shall become the shooter who shall select and retain two of the dice offered. The remaining dice of the set shall be returned to the bowl, which shall be placed immediately in front of the Stickman.
 - Each player may roll the dice for the length of one hand; on either a Seven Out, or until he/ she passes the dice, voluntarily or involuntarily.
 - At the end of a hand, the chance to shoot the dice will be given to the person to the previous shooter's left.
 - To qualify to shoot the dice, a player must have either a Pass Line or Don't Pass bet.
- ➡ If the shooter has a Don't Pass bet, and is reluctant to accept the Point / number rolled, the player will be given the option of reducing his/ her Don't Pass bet to the table minimum. At least the table minimum must be wagered to shoot the dice. Once reduced, the wager cannot be increased.

★ Players will not be required to roll the dice.

A shooter may pass the dice in the middle of a hand; the player to his/ her left will be asked to complete that hand, then allowed to shoot his/ her own.

1. If there is no point at the time the shooter passes the dice, the next player to shoot will be considered to begin a new hand.
2. If the shooter passes the dice when a point number has been established, the next player to shoot will not be considered to start his/ her hand until after a decision is reached on the existing point.
3. Whenever a voluntary or compulsory relinquishment of the dice occurs, the Stickman shall offer the complete set of five dice to the player immediately to the left of the previous shooter.
4. If the shooter requests new dice, the request will be granted. Dice coming out of play will be inspected before being put in the dice bowl.

➤ Players will be permitted to roll the dice when it is their turn.
Players will not be permitted to roll the dice contrary to the normal shooting rotation.

1. One player may not pass the dice in favor of another unless the other player would in fact be the next shooter in the normal rotation.
 2. A player may not change positions at the table simply to secure an extra chance to roll the dice. While such a player may occupy any position at the game desired, he/ she will not be given an extra opportunity to roll the dice.
- If a customer has been inadvertently deprived of the chance to roll the dice, and a new hand is in progress, that hand will be finished. After the completion of the hand, the player missed will be given the dice. Once that hand is over, the dice will pass to the player who would have been next to shoot if the dice had not been “backed up”

Moving the Dice:

If the dice are hidden behind checks, the base dealer should move the checks so the customer is satisfied with the call, then set the dice out using the following procedures:

1. With the palm of the hand open and facing upward, the Dealer should grasp the dice between the sides of the index and middle fingers.

2. The dice should then be moved to the nearest portion of the layout where it will be clearly visible to the players. Move onto the “come” area.
3. At no time should the Dealer’s hand cover the dice as to obscure the amount showing. Nor must the Dealer handle the dice in any fashion which could cause suspicion that it has been turned.

Correct shooting of Dice:

- It is responsibility of the Stickman to see players throw the dice properly and in accordance with the following procedures:
 - The dice must be rolled so that both die leave the shooter’s hand simultaneously and in manner calculated to cause them to strike the end of the table farthest from him.
 - The dice must roll down the table. Players may not loft, slide or spin or repeatedly bang the dice on the table.
 - Both dice should roll at least one half the length of the table to be called. In general if the stickman is skeptical of the legitimacy of a roll he /she may stop the dice and call “no roll”. Discretion must be used in such instances, however:
1. Dice should only be stopped on rare occasions, such as when the roll is weak, or the shooter persists in rolling them incorrectly.
 2. Stickman should remember that most novice players do not know how to Roll the dice correctly. In many such cases, stopping the dice because of a poor roll, will only cause the player needless embarrassment. Allowing one such roll and following it with diplomatic instruction on how the dice should be rolled will normally produce more satisfactory results for all concerned.
 3. Often it will be better for the Dealer nearest the shooter to make these corrections.
- Players may not set the dice, rub them together in their hands or on the layout, or handle them in any other unusual manner prior to throwing them. The player must use only one hand when shooting.

The following explanation is given for this procedure:

1. Setting dice delays game.
2. Rubbing can nick or chip edges, round corners.
3. Rubbing on layout can burn or shave dice.
4. Switching hands can result in switching dice.

- Any necessary corrections must be made with courtesy and tact. In such cases, the Stickman, or any other Dealer involved, must strive to be helpful, not accusing. Should it be necessary to stop the dice, every effort must be made to grab at least one die so that the players never see a total for that roll.

Irregularities:

In general the Stickman must call all dice which have been properly thrown according to the procedures. The following will govern determination as to whether a throw is "dice or "no dice"

- Cocked Dice: "Cocked Dice" results when a die lands in such a way that it is leaning against another object, rather than resting flat on the surface of the table. Had the object not been on the table the die would have fallen flat on the surface of the table or its "natural fall". All such die are to be called according to the high or uppermost side of the die (opposite object). The total of the dice must be called before the dice are moved. Do not attempt to demonstrate the "natural fall". The die may be accidentally pushed creating an unnecessary argument.
- If one or both dice stop on money on the layout, it is "dice" and will be called.
- "No Dice" or "No roll" will be called only in the following circumstances.
 1. If the dice stop with one on top of the other, it is "no roll"
 2. Either one or both of the dice come to rest on the chips constituting the craps bank in front of the Boxman. Fills or credits that are on the game are considered part of the bank.
 3. Either one or both dice land in the dice bowl.
 4. If the dice is suspended equally between two objects.
 5. Whenever either or both of the dice go off the table, including the rail surrounding the table.
 6. If the wrong player picks up the dice and shoots them.
 7. If one or both dice are slid, not rolled or thrown.
 8. If both dice do not leave the shooter's hand simultaneously.
 9. If more than two dice are thrown.
 10. If the shooter does not have a line bet.
 11. If the side opposite the resting side cannot be determined. A die can only have one side at rest to be properly called. A die resting on more than one object cannot be properly called.
 12. A player purposely interferes with the natural flight or fall of the dice.

When in doubt say “**CALL IT**”

The Boxman has the authority to overrule the Stickperson's call.

When confronted with the situation involving calling “ no roll” the Stickman must announce the decision quickly and clearly.

Making change:

- The inside Dealers will be responsible for making change.
- The amount of the change and any portion of it to be wagered must be called out at the time the Dealer accepts the currency from the player.
 1. When the currency is for change only, the Dealer should so state for example: “Change only (or money change) \$20”
 2. When the currency is to be partially wagered, the Dealer must indicate the type and amount of the wager and the amount of the change. For example: “ \$5 goes on the line, \$15 change.
- When a player buys in with cash, it should be passed to the Box man to verify the amount before the chips are given to a player. (Do not hold up the game)
- Place currency or cheques (chips) to be changed in the center of the table next to the paddle in front of the Box person on the side the currency came in on.
- For any amount that is not easily discernible and for amounts \$100 and above, the Dealer must wait for an O.K. from the Box person before sending the change out.
- After the Box person calls out the amount, cut the change out in the Come using your inside hand, then hand it off using your outside hand.

Note: Under no circumstances may change be cut out on the Come numbers. Dealer must clear hands after every transaction.
Under no circumstances may the change pass directly from the Dealer's hands into the player.

- Change which has been cut out must finally be stacked and handed off onto the apron of the layout in front of the appropriate customer.
- When a portion of the change is to be wagered, the change must be first cut out. Bets will be placed out of the change.
- Bets must be called out and acknowledged. The remaining change will be handed off to the apron of the layout in front of the player making the wager.

Color change

A player requesting Color Change wants to exchange their chips for a higher denomination of chips.

When a player requests a color change (cash out)

1. Call out "color coming in," and wait until the Box person gives permission to bring the money in.
2. Clear your hands bring all the money to the center of the table.
3. The Box person shall cut it down and inform the Dealer the amount of the color change.
4. The Dealer shall cut out the appropriate change in higher value chips on the come with his/her inside hand.
5. The Box person will verify the amount and say "Send It".
6. The Dealer will then hand it off with his/her outside hand, placing all the chips on the apron(off the layout!) in front of the appropriate player.

Note: Call all transaction loud and clear before beginning with the transaction.
Do not cover the stack with palm of your hand

Proving Single Color Payoffs Or Change

1. \$1.00, \$5.00, \$100.00, and \$1,000.00 cheques(chips) shall be run down in stacks no greater than 5 cheques(chips) high.

EXAMPLE:

1 through 5 - 1 stack
6 3 - 3
7 3 - 3 - 1
8 4 - 4
9 4 - 4 - 1
10 5 - 5
11 5 - 5 - 1
20 5 - 5 - 5 - 5

(No more than 20 cheques in a row)

2. \$25.00, \$500.00 and \$5,000.00 cheques shall be run down in stacks no greater than 4 cheques high.

EXAMPLE:

1 through 4 - 1 stack
5 - 4 - 1
6 - 3 - 3
7 - 3 - 3 - 1
8 - 4 - 4
9 - 4 - 4 - 1
10 - 4 - 4 - 2
12 - 4 - 4 - 4
20 - 4 - 4 - 4 - 4 - 4

(No more than 20 cheques in a row)

When proving more than one full stack, prove one stack of twenty cheques then stack it up to prove the remaining stack(s).

\$1,000 cheques will be cut 2, 2 and 1; then stacked up in 5's and sized into.

\$500 & \$5,000 cheques will be cut 2 and 2; then stacked up in 4's and sized into.

Mixed color bets

Dealers must see that all mixed color bets are placed in the proper order.

1. Checks of different denominations should be separated from another and all arranged in ascending order with the smallest denominations at the top and the largest at the bottom of the stack before payment.
2. Barber poles are not permitted and such wager must be properly separated by the Dealer before taking or paying the bet, particularly if the total amount of the wager is not easily readable. This will only be done when it is necessary to make sure the wager does not exceed the table maximum.

Fills.

When a fill is delivered to the game; the Boxman must do the following.

- a. Empty the chips from the racks.
- b. Cut down one stack of the highest denomination of chips, stack and size into the remaining stacks.
- c. Break down any "short" stacks.
- d. verify the following information:
 1. Date
 2. Time.
 3. Pit
 4. Game Type
 5. Table number.
 6. Amount of each denomination of gaming chips.
 7. Fill total.
- e. Sign the slip.
- f. Let a Dealer sign.

The back of the yellow copy with the total amount written on it, will lay face down on the bankroll for couple of minutes so surveillance can verify the amount. Copies will be dropped by the Box man.

If an error of any kind is found during verification, the fill and fill slip will be returned to the cage for correction. The chips will not be added to the bankroll.

Credits:

When the Security Officer arrives at the table with the Credit Order, the exact amount of chips to be removed shall be proven in the work area in front of the Box man and placed in the chip carrier.

The Box man will verify that the information on the Credit Slip is correct:

1. Date
 2. Time
 3. Pit
 4. Game Type
 5. Table Number
 6. Total of all denominations of gaming chips.
 7. Credit total.
- The Box man and the Dealer then sign the Credit request together with kronus number.
 - The Security Officer will bring the chips at the Cashier for processing and verification, and shall return from the cashier's cage with the copy of the Credit request signed by the cashier who accepted the chips. The Boxman will then drop the slip.
 - Should an error or irregularity be noted by the Boxman or Dealer they will not sign the Credit slip, or allow it to be dropped.

Opening/ Closing of the game:

- Prior to opening of a Craps table for gaming, it is the responsibility of the Box man to count the table inventory with a Dealer.
- All \$500 and \$100 chips will be placed on the working area in front of the Box man which will cut one stack of the highest denomination and size into the remaining stacks.
- Box man and Dealer will sign together with kronus number and the slip will be dropped by the Box man.
- At closing the Box man will "even up" the table by making a fill so the total inventory remains the same as the opening inventory.

PLAYING THE GAME

There are two types of wagers handled by the base dealers:

EVEN MONEY or FLAT – Bets that pay the same as the amount wagered

1. Pass Line / Don't Pass Line
2. Come / Don't Come
3. Field – with the exception of 2 or 12

ODDS - Bets that payoff in relation to the probability of the bet winning.

1. Additional wagers "backing up" Flat bets on the Pass / Don't Pass or Come / Don't Come.
2. Place Bets
3. Buy or Lay Bets

Pass line/ Come Bet:

- "Pass Line Bet" shall mean a wager placed on the Pass Line of the layout immediately prior to the come out roll. The Pass Line Bet shall win, if, on the come out roll:
 1. A total of 7 or 11 is thrown; or
 2. A total of 4, 5, 6, 8, 9, or 10 is thrown and that total is again thrown Before a 7 appears.
- **The Pass Bet** shall lose if, on the come out roll:
 1. A total of 2, 3, or 12 is thrown; or
 2. A total of 4, 5, 6, 8, 9, or 10 is thrown and a 7 subsequently appears before that total is again thrown.
- "**Come Bet**" shall mean a wager placed on the Come Line of the layout at any time after the come out roll. The Come bet shall win, if, on the roll immediately following placement of such bet.:
 1. A total of 7 or 11 is thrown; or
 2. A total of 4, 5, 6, 8, 9, or 10 is thrown and that total is again thrown before a 7 appears.
- The come bet shall lose, if, on the roll immediately following placement of such bet:
 1. A total of 2, 3 or 12 is thrown; or
 2. A total of 4, 5, 6, 8, 9 or 10 is thrown and a 7 subsequently appears before that total is again thrown.
- Pass Line and Come Bets will be paid at odds of 1 to 1.

Odds:

Odds are supplemental wagers that are made along with even money wagers on the Pass/Don't Pass, Come/Don't Come.

*Players **"TAKE"** odds on the Pass Line and Come, and **"LAY"** odds on the Don'ts.*

- Whenever a player makes a Pass Bet or Come Bet and a total of 4, 5, 6, 8, 9, 10 is thrown on the next roll, he / she shall have the right to make an additional wager called "odds" in support of the Pass or Come Bet equal to the amount of the original bet.
- If in such circumstance, the Bet wins, the odds shall be paid at:
 - a) 2 to 1 if the come out point was 4 or 10,
 - b) 3 to 2 if the come out point was 5 or 9,
 - c) 6 to 5 if the come out point was 6 or 8.
- Odds shall be inactive "off" on the come out roll unless the player specifies otherwise (i.e. "odds are working") and the Dealer acknowledges that fact and marks the bet with an "ON" button.
- The Dealer is responsible to check that all odds taken on a Pass Line are correct.
Checks should be made periodically while the hand is in progress.

The odds work as follows:

Point	Winners	Losers	ODDS
4 & 10	3	6	2 to 1
5 & 9	4	6	3 to 2
6 & 8	5	6	6 to 5

2 to 1 odds – for every \$1 taken the payoff is \$2

3 to 2 odds – for every \$2 taken the payoff is \$3

6 to 5 odds – for every \$5 taken the payoff is \$6

Don't Pass/ Don't Come:

- **'Don't Pass Bet'** shall mean a wager placed on the Don't Pass Line of the layout immediately prior to the come out roll. The Don't Pass Bet shall win, if, on the come out roll:
 1. A total of 2 or 3 is thrown; or
 2. A total of 4,5,6,8, 9 or 10 is thrown and a 7 subsequently appears before that total is again thrown.
- **The Don't Pass Bet** shall lose, if, on the come out roll:
 1. A total of 7 or 11 is thrown; or
 2. A total of 4, 5, 6, 8, 9, or 10 is thrown and that total is again thrown before a 7 appears.
- The Don't Pass Bet shall be a "push" (no action or tie), if, on the come out roll, a total of 12 is thrown.
A Don't bet may be decreased or removed, but never increased.
- **'Don't Come Bet'** shall mean a wager placed on the "Don't Come" area of the layout at any time after the come out roll.
The Don't Come Bet shall win, if, on the roll immediately following placement of such bet:
 1. A total of 2 or 3 is thrown; or
 2. A total of 4, 5, 6, 9, or 10 is thrown and a 7 subsequently appears before that total is again thrown.
- **The Don't Come Bet** shall lose, if, on the roll immediately following placement of such bet:
 1. A total of 7 or 11 is thrown; or
 2. A total of 4, 5, 6, 8, 9, 10 is thrown and that total is again thrown before a 7 appears.
- There will be no action on Don't Come if the roll of the Dice is 12.
A Don't Come bet may be decreased or removed, but never increased.
- A winning wager on the Don't Pass or Don't Come shall be paid at the odds of 1 to 1. A player may take all or part of his Don't Come off at any time after a point is established or prior to a roll that decides the outcome of the wager. If the shooter has a Don't Pass bet and wishes to take it off; he must have at least the table minimum on or behind the point.

- Whenever a player makes a Don't Pass or Don't Come bet and a total of 4, 5, 6, 8, or 10 is thrown on the come out roll, he shall have the right to make an additional wager called A "**LAY BET**" in support of the Don't Bet, an amount so calculated as to provide winnings not to exceed the original wager on the Don't Bet. If in such circumstances, the Don't Pass Bet wins, the lay bet shall be paid at odds of:
 1. 1 for 2 if the come out point was 4 or 10.
 2. 2 for 3 if the come out point was 5 or 9.
 3. 5 for 6 if the come out point was 6 or 8.

ODDS: Don't Pass Line and Don't Come Bets:

Odds on the Don't Pass and Don't Come are exactly opposite of the Pass and Come. Since these bets win on a 7, there are always 6 winning combinations.

Point	Winners	Losers	ODDS
4 & 10	6	3	1 to 2
5 & 9	6	4	2 to 3
6 & 8	6	5	5 to 6

1 to 2 odds – for every \$2 laid the payoff is \$1
 2 to 3 odds – for every \$3 laid the payoff is \$2
 5 to 6 odds – for every \$6 laid the payoff is \$5

Place Bets/ Buy Bets

- "Place Bets" shall mean wager that may be made at any time on any of the numbers 4, 5, 6, 8, 9, 10 which shall win if the number on which the wager was placed is thrown before a 7. A "place bet" shall lose if a 7 is thrown before such number.

➤ The payout odds on place bets shall be as follows:

Place Bet on 4 or 10 - pays ➡ 9 for 5

Place Bet on 5 or 9 - pays ➡ 7 for 5

Place Bet on 6 or 8 - pays ➡ 7 for 6

- All place bets shall be inactive on any come out roll unless called "ON" by the player and confirmed by the Dealer through placement of an "ON" marker button on top of such player's wager.
- Place Bets are non-contract bets that can be increased, decreased, removed or stay the same ("same bet") at the player's instruction.

Example: 4 and 10

1. Place bet odds are 9 to 5.
2. Bets must be made in units of 5.
3. Figuring out the payouts:
Divide the bet by 5 then multiply by 9.

EXAMPLE: \$15 PLACE 4

15 DIVIDED BY 5 = 3

3 x 9 = \$27

★ **NOTE:** Most players will buy the 4 and 10 once the amount wagered reaches \$20

5 and 9

1. Place bet odds are 7 to 5.
2. Bets must be made in units of 5.
3. Figuring out the payouts:
Divide the bet by 5 then multiply by 7.

EXAMPLE: \$25 PLACE 9

25 DIVIDED BY 5 = 5

5 x 7 = \$35

6 and 8

1. Place bet odds are 7 to 6.
2. Bets must be made in units of 6.
3. For every 6 units, bet on the 6 or 8, 1 unit will be healed forward and is known as the "cap".

EXAMPLE: \$24 PLACE 6 - There are 4 units of 6, therefore the cap will be 4.

Figuring out the payouts:

Mathematical: Divide the bet by 6 then X by 7.

EXAMPLE: \$18 PLACE 6

18 DIVIDED BY 6 = 3

3 x 7 = \$21

Cap Method: 7 X the cap will equal the payoff.

\$18 PLACE 6 HAS \$3 CAP

3 x 7 = 21

Buy Bet.

- Buy Bets are wagers that are handled like Place Bets but pay true odds after a 5% commission is paid. This commission is also called vigorish, vig or juice.
 - Buy Bets must be a minimum of \$20 and are identified by a lammer placed on top of the bet. All commissions are rounded down to the nearest whole dollar amount
- The payout odds on buy bets shall be as follows:

Buy Bet on 4 or 10-pays  **2 for 1**

Buy Bet on 5 or 9- pays  **3 for 2**

Buy Bet on 6 or 8- pays  **6 for 5**

- All buy bets on the front side should be paid in FRONT of that player, in order with come bets.
- Buy bets to win will be automatically off on the come out roll unless the player requests otherwise at which time the Dealer will mark his bet with an "ON" button.

Note: Buy bets pay exactly as odds but require no flat bet, no contract bet.

The vig must be repaid each time the bet wins if the player wants to keep the bet in play. The vig will be returned if the bet is removed before it wins or loses.

Example:

<u>Bet</u>	<u>Vig</u>
\$20 - \$39	\$1
\$40 - \$59	\$2
\$60 - \$79	\$3
\$80 - \$99	\$4
\$100 - \$119	\$5

Lay Bets:

Lay Bets are wagers made against any of the point numbers. The player pays a 5% commission to get true odds. The commission is based on the **winnings, not the wager**. Lay Bets must win at least \$20 and are identified by a lammer placed on top of the bet.

Example:

\$40 lay against the 4 pays \$20: the vig is \$1

Bet	Lay	Vig	Payout
\$102 no 10	\$100	\$2	\$50
\$155 no 5	\$150	\$5	\$100
\$100 no 6	\$96	\$4	\$80

The vig must be repaid each time the bet wins if the player wants to keep the bet in play. The vig will be returned if the bet is removed before it wins or loses

Field Bet:

A Field Bet shall mean a one roll wager that may be made at any time which shall win if any one of the totals 2, 3, 4, 9, 10, 11, or 12 is thrown on the roll immediately following placement of such bet and shall lose if a total of 5, 6, 7, or 8 is thrown on such roll.

The payout odds on a Filed Bet are:

1. Number 3, 4, 9, 10 or 11 pays 1 for 1
2. Number 2 or 12 pays 2 for 1.

PROPOSITION BETS

Proposition Bets are **for one (1) roll** only (unless they win) and can be made before any roll (Come Out, Intermediate, or Decision). These bets are handled by the Stickperson.

- **"Any Seven"** wins if a total of 7 is thrown and loses on all other combinations. **Odds pay 4 to 1**
- **"Any craps"** wins if a total of 2, 3 or 12 is thrown and loses on all other combinations. **Odds pay 7 to 1**
- **"Craps two"** (also called **"Snake eyes"**) wins if a total of 2 is thrown and loses on all other combinations. **Odds pay 30 to 1**
- **"Craps three"** (also called **"Ace-Deuce"**) wins if a total of 3 is thrown and loses on all other combinations. **Odds pay 15 to 1**
- **"Craps twelve"** (also called **"boxcars"**) wins if a total of 12 is thrown and loses on all other combinations. **Odds pay 30 to 1**
- **"Eleven"** (**"Yo Eleven"**) wins if a total of 11 is thrown and loses on all other combinations. **Odds pay 15 to 1**
- **"Horn Bet"** divides equal units of the total bet between the Aces, Twelve, Ace-Deuce and Eleven. The bet wins when any of these combinations are thrown. The winning odds are paid and the losing amounts are subtracted so that the bet can remain in play ("Up to win again"). Horn Bets must be booked in units of \$4 or \$5.

Example:

A \$4 Horn has equal \$1 amounts on 2, 12, 3 & 11. If the Aces roll, the payout would be $\$1 \times 30 = \30 - \$3 in losing bets = \$27 and up to win again.

- **"Horn High Bet"** is a horn bet with an extra unit on one of the four combinations. A \$5 Horn High Yo, is a \$4 horn plus \$1 more on the 11. Horn High Bets must be booked in units of \$5.
- **"World Bet"** (**"Whirl Bet"**; **around the world**) is a horn bet plus an equal amount on the Any Seven. World Bets must be booked in units of \$5. (Includes "any seven", 2, 3, 11 and 12)
- **"Hop bet"** a one-roll bet that may be made at any time on a specific combination of the dice. Any **"Hardway"** (pair) bet as a **"Hop Bet"** pays **30 to 1**. All non-pair combinations pay **15 to 1**.

- One roll proposition bets shall be paid at the following odds:

Any Seven	pays	4 to 1
Any Craps	pays	7 to 1
Craps 2	pays	30 to 1
Craps 3	pays	15 to 1
Craps 12	pays	30 to 1
Eleven	pays	15 to 1

A “**C and E**” or “**Craps- Eleven**” pays 3 for 1 if any craps rolls and 7 to 1 if the eleven rolls. The odds paid are based on the total wager.

Example:

A \$5 “C and E” pays \$15 for any craps and \$35 for the eleven. If any other number is thrown, the wager loses.

Booking Proposition Bets

1. There are three (3) elements that are always part of booking any bet:
 - a. What it is.
 - b. Where it is.
 - c. How much it is.

EXAMPLE: "FIVE DOLLAR ELEVEN, THREE FROM ME."

2. Players will not always throw in exact money. Change will be given to the player by the Base Dealer.
3. It is the responsibility of all the Dealers to book proposition bets, but only the Stickperson should set them up.
4. Never book a bet that you don't understand. **"No Bet this Roll"**
5. Once the dice have left the center of the table, the Stickperson can only book bets that are thrown in from the side the shooter is on, but he/she should not set them up. Bets that are thrown in from the side the dice are landing should be booked by that Base Dealer.
6. Any time a **Base Dealer books a proposition bet, he/she should place the money in front of the Box person, don't throw it into the middle of the table.**
7. When accepting a bet from a player, **always try to make eye contact.** There will be times when several players throw money in at the same time. Don't start picking money up without knowing to whom it belongs. Make the players identify it.
8. Prop Bets that include 2 combinations (SPLITS) can be made in any amount. Bets that have 3 combinations (3 WAYS) must be booked in units of \$3.
9. Prop action can become very heavy; **DON'T BE AFRAID TO TAKE CONTROL!!**

Making Proposition Bet Payoffs

1. The Stickperson is responsible for directing proposition bet payoffs.
2. All proposition bets shall be paid from the Stickperson around to the Base Dealer, in order. The Stickperson will start on the end to which the dice were thrown (his/her end).
3. The Base Dealers shall count out and deliver all proposition bet payoffs for their respective ends of the table.
4. Payoffs shall be made only after the Base Dealer has completed all other work on his/her end of the layout and the Stickperson has removed all losing proposition wagers from the betting portion of the layout.
5. When making a payoff, the Stickperson must announce the amount, as well as the type of the bet for which the payoff is being made. Place the stick in front of the player to be paid.

EXAMPLE: "Please pay this gentleman \$140.00 for his \$20.00
Eleven/Twelve split."

6. The Stickperson should monitor the accuracy of the payoffs as they are made.
7. Payoffs for winning proposition bets shall not be paid to the player until told to do so by the Stickperson. The payoffs for winning proposition bets shall be cut out in front of the Dealer in the come area of the layout, and placed on the apron in front of the player, **not in a betting area**.
8. If a player has a winning proposition bet along with several losers, we will keep him up on all his bets.

Hardways:

- Hardway bets are not considered proposition bets because they are not one (1) roll bets.

**“Four the Hardway” - “Six the Hardway” - “Eight the Hardway”
“Ten the Hardway”**

- The numbers 4, 6, 8 and 10 are said to roll the “Hardway” when the dice roll in pairs (2-2, 3-3, 4-4, or 5-5).
- Combinations that are not pairs (3-1, 4-2, 5-1, 6-2, 5-3 and 6-4) are known as the “easy” or “soft” combinations. Hardway bets can be made at any time and will remain in play until the number rolls easy or a seven out.
- Hardways do not work on the come out roll, but can, if the player wishes them to. These bets can also be called “OFF” (Not Working) or taken down at any time.

Payout:

Hard 4 and 10 (2 and 2 - 5 and 5)
Odds are 7 to 1

Example: \$5 hard 4  $7 \times 5 = \$35.00$

Hard 6 and 8 (3 and 3 - 4 and 4)
Odds are 9 to 1

Example: \$5 Hard 6.  $9 \times 5 = \$45.00$

Both the **Base Dealer** and the **Stickperson** are responsible for “booking” the Hardway Bets. The **Stickperson** will set up new bets, remove losing bets, and instruct the **Base Dealer** where and how much to pay winning bets.

Handling the stick.

- While the dice are in the middle of the table, the stick is to be placed at the Dealer's side, resting on the edge of the table and layout.
- The craps stick will be used only to give dice to the shooter, to retrieve the dice once thrown and return them to the "box", and with the utmost discretion, as a pointer with which to refer a customer or Dealer to various parts of the layout.
- The craps stick may not be used for moving the dice boat, pucks, or any other object, except the dice. The stick may not be used to remove losing wagers from the layout.
- When putting the dice out to the shooter, the stickman must be careful to avoid disrupting any bets from the layout.
- The stickman should place the dice directly in front of the shooter. Do not give the shooter the dice with " craps" (i. e. 2, 3 or 12) showing on the come- out roll, or with "7" showing when there is a point.
- While the dice are rolling, the stick should be held high enough over the layout that it will be out of the way of the dice.
- After the dice have been thrown, they may not be touched with the stick until the total has been called at least once. The dice must be retrieved before the Dealer begins paying any bet.
- Under no circumstances may the Stickman "cross-over" him/ herself so that full view of the proposition bet area of the layout is obstructed.
- As the dice are brought closer to the Stickman, he/ she should change hands on the stick and bring the dice up through the proposition betting area of the layout and into the "box".
- The Stickman should keep the end of the stick being held as close to the surface of the layout as reasonably possible. This will increase control of the dice and also reduce awkwardness.
- If one or both dice land in an area inaccessible to the Stickman, he/ she should request the Inside Dealer to move them to an area which can be reached.
- When the Stick is not in use, as between rolls, it should be held in a generally vertical position at the side of the Stickman.
- The stick may also be used to indicate the player to who, dice are to be given or to whom a payoff is to be made. In such cases the stick should be pointed downward toward that part of the apron directly in front of the player in question. The Stickman must never point the stick directly at the person.
- The stick should never be used in a threatening manner, nor should it touch the dice before they have completely stopped, **unless to invalidate a roll.**

- When sending the dice, hold the stick in the hand opposite the shooter. Pick a clear line between yourself and the shooter, bending the stick slightly while taking the dice from the center will give you better control. Hold your hand low to the table while pushing the dice to the shooter. Try to stop the dice near the Pass Line next to the shooter's bet.
- When retrieving the dice, use the stick to move the dice to the apron of the Layout (out of the base dealer's working area). Pull the dice around the apron until you reach the words *PASS LINE*. Switch hands with the stick, take a step back from the table and pull the dice into the center in front of the box person.
- Square and Spread the dice.

Calling the Dice

The purpose of calling the dice is to announce what number has been thrown and to help direct the efforts of the other Dealers.

The following procedures will govern the calling of Dice:

- Only the stickman will call the dice, unless he / she specifically instruct another Dealer to do so because both dice cannot be clearly seen from the stick position. If this happens the stickperson may instruct the base dealer to " Call it"
- The stickman may call dice only after they have come to a complete stop. The stickman shall at once call out the sum of numbers on the high or uppermost sides of the two dice.
- The total of the two dice must be called at least once before the stick man or any other Dealer may touch them either directly or with the stick.
- All calls must be clearly audible and intelligible to the players, other Dealers and supervisors. Loudness and clarity are of equal importance.
- The following information must be included first when calling throws of the dice under the conditions indicated:

The stick calls announce the type of roll that is upcoming, and tell the procedure that the Base Dealers follow as a result of that roll. There are three types of rolls, each having specific calls and procedures.

1. Come Out Roll – The roll which establishes a point
2. Intermediate Roll – Any roll while the point is established
3. Decision Roll – The roll which determines the outcome of the point.

Come Out Roll

Announcing the Come Out Roll:

"Craps, Eleven, Any Seven, World Bets, Horn Bets, Hi - Low's and Yo's we're coming out."

Results of the Come out Roll:

2-Two Craps Two, line away, the don'ts to pay, double the field.

3-Three Craps Three, line away, the don'ts to pay, single the field.

4-Four (Easy or Hard) Four, mark the four, down behind the four, field roll four.

5-Five, mark the five, no field five, down behind the five.

6-Six (Easy or Hard) Six, mark the six, no field six, down behind the six.

7-Seven Winner Seven, front line winner seven, take the don'ts, the field and pay the line, save the odds, pay behind. All working bets have action.

8-Eight (Easy or Hard) Eight, mark the eight, no field eight, down behind the eight.

9-Nine, mark the nine, field roll nine, down behind the nine.

10-Ten (Easy or Hard) Ten, mark the ten, down behind the ten, field roll ten.

11-Yo Eleven Winner Yo Eleven, front line winner eleven, take the don'ts and pay the line, single the field.

12-Twelve Craps Twelve, line away, bar the don'ts, double the field.

Results of an Intermediate Roll:

2-Two Craps Two, come away, pay the don't come, double the field.

3-Three Craps Three, come away, pay the don't come, single the field.

4-Four (Easy or Hard) Four, (down behind the four), field roll four, don'tsand comes travel to the four.

5-Five No Field Five, (down behind the five), don'ts and comes travel tothe five.

6-Six (Easy or Hard) Six, no field six, (down behind the six), don'ts andcomes travel to the six.

8-Eight (Easy or Hard) Eight, no field eight, (down behind the eight),don'ts and comes travel to the eight.

9-Nine, (down behind the nine), center field nine, don'ts and comes travel to the nine.

10-Ten (Easy or Hard) Ten, (down behind the ten), field roll ten, don'ts and comes travel to the ten.

11-Yo Eleven Yo, (take the don't come), pay the field and come.

12-Twelve Craps Twelve, come away, bar the don't come, double the field

Decision Rolls

4-WINNER Four, front line winner four, take the don'ts, pay the front line, single the field, the four came (Hard or Easy), don'ts and comes travel to the four.

5-WINNER Five, front line winner five, take the don'ts and field, pay the front line, don'ts and comes travel to the five.

6-WINNER Six, front line winner six, take the don'ts and field, pay the front line, the six came (Hard or Easy), don'ts and comes travel to the six.

7-OUT Seven, line away, take the don't come and field, pay the don't pass, last comes a winner, and pay behind. Point was _____.

8-WINNER Eight, front line winner eight, take the don'ts and field, pay the front line, the eight came (Hard or Easy), don'ts and comes travel to the eight.

9-WINNER Nine, front line winner nine, take the don'ts and pay the front line, single the field, don'ts and comes travel to the nine.

10-WINNER Ten, front line winner ten, take the don'ts and pay the front line, single the field, the ten came (Hard or Easy), don'ts and comes travel to the ten.

Dice calling Techniques:

- An important function of the Stickman is to direct the attention of the Inside Dealers and players to the result of every roll, while at the same time generating increased betting activity.
- Stickman should develop a manner of calling which is both informative and colorful. To this end, a certain latitude will be permitted for Stickman in creating their individual dice calling styles. This freedom, however, must be limited by the following considerations:
 1. Each call must start with the information appropriate to that particular roll as specified in the Dice Calls procedures.
 2. All calls must be in accordance with good taste and common sense.
 3. Stickman must not persist in verbal or tonal habits of calling which are likely to irritate or confuse players, onlookers, Dealers, Managers.
For example, the constant repetition of the same phrase or a continues monotone can frequently prove tiresome to both customers and Dealers.
 4. During the period between calls, the Stickman must advertise the different betting options available to the players, especially (though not exclusively) the proposition bets.
 5. Stickman should be aware that in Craps there is a winner on every roll, and this fact should be appropriately brought out in the calls.
Again, it is an important part of a Stickman's role to produce as high a degree of betting activity as is reasonably possible.

Control of Game Pace

The Stickperson sets the pace of the game subject to the following instructions.

1. The game must move as fast as is consistent with the action and ability of the Inside Dealers.
2. The Stickman must observe both players and Dealers so that potential bets are not missed, or Dealers are not rushed into errors.
3. The Stickperson should be prepared to allow players extra time to make wagers immediately before and after each come out roll.
4. Do not hold the game up for:
 - A. **CHANGE ONLY**
 - B. **CHEQUE COLOR**
 - C. **COLOR**
 - D. **MARKERS**

**** UNLESS THE SUPERVISOR TELLS YOU TO DO SO****

5. The Stickperson must not allow the shooter possession of the dice until both Inside Dealers have completed all work for the last roll.
6. Novice players should be politely encouraged to keep up with the game. If a player continues to hold the game up, inform the Box person.
7. During intermediate rolls the dice should be sent to the shooter just as the last bet in base procedure has been paid.
8. Use **"GAME INTUITION"** (Knowing what the player wants, before he tells you) plays a very important role in moving the game.

Examples:

- A. If you are the Stickperson, and a player has been making the same bet every come out roll, ask him for it. Don't wait for him to throw it in.
- B. If you are the Base Dealer, and a player presses his place bet or goes down with odds, do it, while you are telling him you are doing it.

Duties and Responsibilities of the stickperson.

1. **The Stickperson** shall always watch the dice. The only time this is not necessary is when the dice are in the center of the table, in front of the box person. Have the box person check any die you lose sight of.
2. Keep the dice "Squared and Spread" in between rolls. This enables the box person to see five sides of the dice.
3. Keep the dice in the bowl "locked together, with the bowl "flush" against the mirror.
4. Verify that the points are marked correctly on both bases.
5. Book and place all Proposition, Hop, and Hardways wagers.
6. Stickman will repeat all proposition bets loudly and clearly so that the player, Boxman and the Dealers are aware of what and how much the bet is. This will be done even if the Dealer on base has booked the bet.
7. Remove all losing wagers and pay winning wagers.
8. In between rolls, "Talk up the Game" by advertising the Props and Hardways.
9. Watch the end on which the dice land, verifying the base dealer is doing his/her work properly.
10. Responsible for seeing that proposition bets are not under the minimum or over the table limit.
11. Stickman authorizes all proposition payoffs; amount of payoff, who it is for, and what the bet was.
12. Stickman is responsible for all hardway bets that are working on any given roll and will mark such bets with an "on" button.
13. Control the pace of the game by moving the dice as the base dealers pay their last bet.
14. Watch the Shooter:
 - a. Make sure the Shooter has a Pass or Don't Pass bet before shooting. Announce to the table any shooter who is shooting from the Don't Pass Line.
 - b. Watch the release of the dice. Look for the shooter's hand to be empty.
Make sure the dice tumble, not slide down the layout.
 - c. Don't allow any player to excessively rub or bang the dice.
 - d. The dice must always remain over the table and in plain sight.
 - e. The shooter must shoot the dice with the same hand that is used to pick them up. The dice must be set down if the shooter wishes to switch hands
 - f. It is the preference of the casino that both dice hit the back wall of the table on every roll. If the dice land short of the wall it is a valid roll. A shooter consistently landing the dice short may be reminded to hit the back wall.

Stickman being relieved:

- A Stickman being relieved must identify the shooter for the incoming Stickman.
- The Stickman should also give the relief any other information which is pertinent to the efficient conduct of the game at the time.
For example:
 - a. Who is always working.
 - b. Problem shooters.
 - c. Who is taking.
 - d. Player's betting patterns.
- The Stickman can only be relieved while the dice are in the " box" position, and after all work for the last roll has been completed.
Before leaving the table, The Stickman must clear his' her hands.

Taking and Paying:

- On any sizable payoff, proposition, odds and place bet, Dealer making the payoff must call out the amount being paid so that the Boxman may have a chance to catch any errors before payoff is completed.
- Cut out the payoff directly in front of you where the Boxman can see it, and then move it off the layout, on the apron, to the player. (Never hand payoff to the player)
- Take- Pay. Always take what the house has won before paying.

- Pass- Line bets will be paid from the outside in or from the base toward the Stickman. Pay the odds and then the flat bet for each individual wager. Pay first bet with outside hand.
- All other bets will be paid from the inside out starting with the player closest to the Stickman and working toward the base.
- Size into all bets of two chips to five chips.

- All bets are to be paid inside the Come line and then placed on the apron in front of the player. No payoff will be cut out directly in front of the player. (pick and pay)
- Come bets should be paid within the Come area in front of the player. Come bets are not handed off to the player like place bets.
- Don't Come bets should be paid in place behind the number then placed in the Don't Come. Place bet on apron in front of the player as a courtesy if player cannot reach payment.

- Buy bets and place bets on the front side should be paid in front of the player.
- Buy bets and place bets on the front side will be paid in order after the Come bets are paid.
- Don't buy bets or Lay bets should be paid through the Don't Come Line and placed on the apron in front of the player.
- No proposition bets are paid to the player unless the Dealer is told to do so by the Stickman.

Dealer Relief:

★ A Dealer may not be relieved until all work for which he / she is responsible has been completed for the previous roll of the dice.

Dealers must supply their "reliefs" with any information essential to the smooth operation of the game.

1. The Stickman must relay all pertinent information.
2. Inside Dealers must inform their "reliefs" of who owns any "Come", "Place" or "Don't" bets.

- When relieving the base Dealer make sure to tap-in from the Base Dealer's outside shoulder and turn towards the center of the table and Boxman.
- Before tapping out the base dealer has to make sure the dice are in the center of the table.
Finish all work (including any Proposition Bets which may have to be paid)
Pass on all pertinent information.
Thank the guest and wish them good luck
- Should a Dealer feel that a break is overdue, the Dealer should inform the Boxman.
- At no time will the Dealer or the Stickman when being relieved change positions while shooter has the dice in his possession.
- Dealers must clear their hands by clapping them together once, and then turning their palms up.

- ➡ After every transaction.
- ➡ Before touching any part of the body
- ➡ When being relieved.

Minimum and Maximum

- If a player has less than the minimum bet, bring it to the player's attention as soon as possible. If it is noticed after a decisive roll, pay or take the amount of the bet wagered and notify the player of the minimum.
- If a player bets over the table maximum and it is not noticed until a decisive roll, inform the player of the table limit and pay or take only the table maximum. Make certain that the Boxman is aware of the situation in case of an argument from. If a bet over the table limit loses the overage must be returned to the player.
- If it appears that a stack of chips may be over the table limit and there is not time to count it down, announce "Play to table limit".

Self-Protection

The Dealer must always clear hands when entering or leaving an area where money or cheques are present. This is a standard practice, which is designed to protect the Dealer, and is mandatory. "Clearing your hands" is done by clapping the hands together. After doing so, the Dealer must expose his/her hands both front and back

Never, under any circumstance, take or place anything directly from or into the hands of any player or fellow employee while on a table game. Always instruct the player or employee to set the item(s) down on the layout so it is in public view. The only exception to this rule is when a player has retrieved a die that went off the game and is returning it to the game. The Dealer is permitted to accept the die directly into his/her hand.

Acknowledge and call out all bets clearly so that the player, other Dealers and the Boxman on the game, understand the bet. State the amount bet, where it plays and to whom it belongs.

Acknowledge "no bet" - If you do not understand a bet state "no bet this roll." Do not pick up cheques tossed in by a player for a bet until and unless you understand what the bet is.

POSITIONING BETS

- Any bet to be placed in or moved to a box number (point number) will be placed in a position relative to the player's position at the game.
- Positioning on each base starts next to the Stickperson with player #1, and continues around to the base dealer for player # 8.
- Inside the box, Dealers shall assign the same numbers (1-8) starting with the first four players in the front of the box with player #1 in the corner closest to the Boxperson.
- The back of the box is for the second four players with player 8's position being in the back corner closest to the Boxperson. Players may move around some, but will never move too far away from their chips.

BOOKING BETS

- When a player requests a bet, the action must be ***"booked"*** by the dealer.
- All bets must be booked by:
 1. Listening carefully to the player
 2. Verbally repeating
 - a. ***What*** the bet is
 - b. ***How Much*** the bet is
 - c. ***Who*** is making the bet
 3. When possible, make eye contact with the player while booking the bet. Show the player where you are placing their money. Try to get confirmation from the player that the bet is booked & placed properly.

Note: Make sure the Boxman knows when placing bets for the players. He is your lifeline when a discrepancy arises.

Proposition Bet Payouts

Methods of Calculating Payouts:

1. Pay the winners and subtract the losers:

This is as basic as it gets. There can only be one winning combination per roll. Multiply the amount bet on the winning number by the appropriate odds, then subtract all losing wagers.

Example: A \$35 World Bet has \$7 on 2, 3, 11, 12 and 7.
If the Aces Roll, pay $7 \times 30 = \$210$ minus \$28 in losing wagers = \$182 and up to win again

2. Memorize Common Payouts: Horn High & World

\$5 Bet				
	Aces	Twelve	Ace Deuce	Eleven
Horn High Aces	\$57	\$26	\$11	\$11
Horn High Twelve	\$26	\$57	\$11	\$11
Horn High Ace Deuce	\$26	\$26	\$27	\$11
Horn High YO	\$26	\$26	\$11	\$27
World	\$26	\$26	\$11	\$11
\$25 Bet				
	Aces	Twelve	Ace Deuce	Eleven
Horn High Aces	\$285	\$130	\$55	\$55
Horn High Twelve	\$130	\$285	\$55	\$55
Horn High Ace Deuce	\$130	\$130	\$135	\$55
Horn High YO	\$130	\$130	\$55	\$135
World	\$130	\$130	\$55	\$55

Note:

The World Bet is always a *PUSH* (winners = losers) when a 7 rolls.

Horn Bet - High Side (2 or 12) only:

Memorizing the payouts from \$1 - \$9 will enable you to pay any bet If \$2 pays \$13.50 then \$20 will pay \$135.00 (just move the decimal). If \$20 pays \$135 then \$22 must pay $\$135 + \13.50 or \$148.50.

Bet	Payout
\$1	\$6.75
\$2	\$13.50
\$3	\$20.25
\$4	\$27.00
\$5	\$33.75
\$6	\$40.50
\$7	\$47.25
\$8	\$54.00
\$9	\$60.75
\$10	\$67.50

On odd amounts, always round UP to the next whole dollar.

Proposition Maximum wagers

When the table minimum is \$5 or \$10 the maximum wager is different of a \$25 table.

EXAMPLE:

	\$5, \$10,	\$15 or \$25
Line	\$300	\$500
Place or Come	\$300	\$500
Eleven	\$50	\$100
Hard 4 & 10	\$125	\$200
Hard 6 & 8	\$100	\$150
Aces or Twelve	\$25	\$50
Any Crap	\$125	\$200
Any Seven	\$125	\$200
HORN HIGH		
World	\$125	\$250
Aces	\$75	\$150
Twelve	\$75	\$150
Ace Deuce	\$125	\$250
Eleven	\$125	\$250

The Maximum wagers for the individual bets can override the maximum wagers for combination bets.

Example: When a player reaches table max on the Horn (\$125 on each - 2, 12, 3 and 11) it is still allowable for that player to bet up to \$125 more on each the Ace-Deuce and Eleven.
